

APA™

Lightweight. Portable. Intuitive.

A fusion of traditional practise with pioneering video technology

◀ **Video Viewer**
The 3.5" high resolution viewing screen provides real time, wide angle view during the intubation procedure

Handle ▶
Ergonomically designed for use as a standard Macintosh laryngoscope or as a video laryngoscope via an independent power supply within the handle

Camera Module ▶
The high intensity LED light source at the distal tip provides a clear image of the laryngeal structure

◀ **Interchangeable disposable blades**
Four variations available, MAC 3 & 4 Macintosh style blades, DAB and U-DAB

MAC 3 Blade

MAC 4 Blade

DAB (Difficult Airway Blade)

U-DAB (Unchannelled Difficult Airway Blade)
